SUMMARY

Frontend Developer with 8 years of experience building fast, accessible, and scalable web applications across React, Vue, Angular, and Drupal ecosystems. Known for jumping into complex projects with minimal ramp-up time and delivering clean, maintainable code under tight deadlines. Awarded for leadership and collaboration on enterprise contracts including Google Next and Purina, with a proven track record of improving performance, streamlining workflows, and driving accessibility from the ground up. Equally comfortable working solo or alongside cross-functional teams, always focused on shipping thoughtful, user-first solutions.

EXPERIENCE

Software Engineer

Nerdery

June 2021 – April 2025, Remote

A digital business consultancy bridging strategy and execution.

- Built and maintained frontend features across 5+ enterprise projects using React, Vue, Angular, Drupal, and Gatsby.
- Architected and delivered dynamic registration and scheduling for Google Next (Vue.js), supporting 50k+ hybrid attendees.
- Led development of a live demo platform for Site Builder, cutting onboarding time for new brands by 60%.
- Engineered scalable Jest testing architecture for a Drupal frontend, reducing regressions by 40%.
- Directed accessibility and performance audits, raising WCAG compliance and code hygiene standards team-wide.

Software Developer

Antech Systems, Inc.

June 2019 – May 2021, Chesapeake, VA

- Developed PMS Document Responsibility feature, one of the system's most complex components, under tight delivery constraints.
- Championed Angular 2+ architecture improvements, enhancing maintainability and performance across legacy codebases.
- Led restructure of mentorship workflows via peer feedback, reducing dev bottlenecks and increasing team efficiency.
- Identified and resolved systemic dev process issues, improving sprint velocity and team alignment.

Website Designer

Trader Interactive

March 2018 – June 2019, Norfolk, VA

- Led accessibility retrofit initiative for ~60 client sites, bringing legacy codebases to WCAG 2.0 / Section 508 compliance.
- Implemented frontend coding standards that improved team collaboration and code maintainability.
- Migrated design workflow to Adobe XD, streamlining handoffs and prototyping efficiency.
- Built and optimized responsive UIs across multiple commercial sites, improving SEO and mobile usability.

Frontend Developer Intern

The Website Guys

November 2017 – April 2018, Chesapeake, VA

- Created and converted design mockups into functional WordPress websites using HTML, CSS, and basic PHP, collaborating with clients directly.
- Gained real-world experience working in a 50% remote team, developing professional communication habits and learning agile task workflows.

EDUCATION

Bachelor of Software Development

OpenClassrooms • Paris, France • 2019

- Completed a rigorous, mentor-led program focused on full-stack web development, accessibility, and real-world project delivery. Defended each project before a jury of industry professionals.
